

Automation streamlines budgeting and reporting

Using Axiom EPM, Sentara has been able to automate and streamline their budgeting processes. This automation has dramatically improved performance. As Beckner notes, “Importing data is much faster, we’re recalculating all of our budgets in 45 minutes, as compared to at least four hours before. Our flex budgeting process now takes 35 minutes tops, instead of hours.” The unified platform also allows the team to easily query and summarize data without having to dig through huge Excel files, potentially saving thousands of dollars in productivity costs.

Outstanding support exceeds customer expectations

“The support with Axiom is outstanding,” says Beckner. “My staff and I are amazed at how quickly we get responses to our questions. It’s almost immediate.” Deep product knowledge, technical expertise and professionalism, make Axiom EPM support staff among the best in the business. Beckner states, “With Axiom EPM we have a team that exceeds our expectations.”

Results

With Axiom EPM, the Finance team is using their time more efficiently. Budgeting and reporting is now fully automated, calculation logic is transparent so errors can be quickly identified and resolved, the budgeting process is faster and less cumbersome, and creating customized reports is fast and efficient. The unique platform design puts Finance in control of the system, minimizing reliance on IT and enabling customized processes and reports.

Axiom EPM application offerings include:

- Budgeting & Reimbursement Modeling
- Financial & Strategic Planning
- Capital Planning & Tracking
- Productivity Tracking & Analytics
- Financial & Management Reporting
